#### ✓ **Battery Backup**

Supplies power long enough for equipment to properly shut down when utility power fails. Helps prevent loss of data and minimizes the component stress caused by a hard shutdown.

#### ✓ **Surge Protection**

Diverts excess voltage away from sensitive electronic equipment during an AC power surge or power spike to prevent damage.

#### ✓ **Automatic Voltage Regulation (AVR)**

AVR increases the AC power and maintains a safe voltage level without switching to battery mode and conserving battery life.

#### ✓ **Multifunction LCD Screen**

Displays immediate, detailed information on the UPS battery and power conditions, alerting users to potential problems before they can affect critical equipment and cause downtime.

✓ **Data Line Protection**

Prevents power surges that travel through Ethernet lines from causing damage to electronics.

✓ **PowerPanel® Business**

Provides IT professionals with tools for monitoring and managing the UPS and backup power. This software offers remote management functionality. Free software download available. See the Resources tab.

✓ **Simulated Sine Wave Output**

Provides a manufactured waveform output to supply cost-effective
